

Seed Technology

Instructions to Authors

Seed Technology is an international journal that publishes original papers, review articles, technical notes and symposia in all areas of seed science and technology. This includes information from applied and basic seed research in physiology, pathology and biology for all plant species. The journal relates to individuals interested in seed production, sampling, testing, conditioning, distribution and storage of agronomic, horticultural and forest seed crops. Papers are accepted on the understanding that they have not been published or submitted to any other scientific journal.

Manuscripts must be clearly written using proper English. If English is not the primary language of the author, the manuscript should be reviewed by someone proficient in English prior to submission to the journal. It is preferred for papers to be submitted by e-mail as an electronic document in MS Word or Corel WordPerfect or they may also be submitted as a hard (paper) copy. See “Guidelines for Submission” at the end of the instructions. Three types of submissions will be considered for publication:

- a. **Full-length manuscripts** should report new information to the subject area or expand on established knowledge to contribute additional information of value. Manuscripts undergo peer review to determine that adequate scientific methods were applied, that interpretations and conclusions are valid, and that all aspects of the study are adequately presented.
- b. **Seed Tech Notes** are appropriate for the reporting of seed laboratory or seed production research that may not justify a full paper, but provide important information of potential practical importance. This may include new techniques or developments, standardization of old techniques or anatomical, pathological or other documentation of seed or seedling development. The requirements for such notes are described below.
- c. **Technical Papers** presented orally or by poster at the annual meeting of the Association of Official Seed Analysts (AOSA) and Society of Commercial Seed Technologists (SCST) are invited, which cover topics of general interest to the seed biologist or technologist.
- d. **Symposia** or workshops presented to the AOSA/SCST membership may be recorded in the journal for future reference. Organizers should prearrange with the Editor to receive papers from the presenters of symposia and workshops within a specified timeframe for inclusion in a single journal issue.
- e. **Review articles** are welcomed by special prior arrangement with the Editor. Reviews should cover a summary of a seed biology or seed technology topic or an evaluation of a seed science or technology related publication. The content of reviews should have a strong technical and/or scientific base.

INSTRUCTIONS FOR FULL LENGTH PAPERS

Manuscripts should be arranged in the following order: **Title** (no separate title page), **Author(s)**, **Abstract**, **Text**, **Acknowledgments**, **References**, **Tables**,

Captions for Figures (separate page) and **Figures**. The title should be concise (10 to 12 words) but informative, containing key words which describe the subject matter for use in abstracting systems. The name of the author(s) should be placed below the title with an asterisk (*) after the name of the corresponding author.

The **abstract** should concisely summarize the entire scope of the paper including findings and conclusions without reference to text or figures. **All categories of manuscripts or papers submitted to the journal must have an abstract.** It should appear immediately below the title and authors and consist of not more than 250 typed words. Do not include a list of key words. The **text** of the manuscript should normally have the subject matter grouped under the following major headings: **Introduction, Materials and Methods, Results, Discussion, Acknowledgments (optional) and References.** Main headings are centered on each page and capitalized in bold type. Secondary headings begin at the left margin (do not indent) with the first letter capitalized and the entire heading in bold print. Use of a previous issue of the journal as a guide to format is recommended.

Author-paper documentation. Author-paper documentation is a single paragraph at the bottom of the first page (under abstract). The first sentence lists the authors (without professional titles) and their complete addresses. If the author has moved, provide the current address. Always end the author-paper documentation with two statements: “*Corresponding author. Received _____.”

Style Manual. *The Style Manual for Biological Journals* prepared by the Committee on Form and Style of the Council of Biology Editors and published by the American Institute of Biological Sciences (AIBS) should be followed for writing papers submitted to *Seed Technology*. *The Publications Handbook and Style Manual* of the American Society of Agronomy can also be used as a detailed guide for both paper and electronic manuscript preparation and can be accessed on line at

<http://www.asa-cssa-sssa.org/publications/style/>

Abbreviations. Use standard abbreviations (for example, Fig., RH, °C) listed in the AIBS Style Manual without definition. Other abbreviations should be defined at first usage and may be used thereafter without further definition. Names of states, provinces and countries should be abbreviated following city names, using appropriate abbreviations of the postal service in that country.

Units. Metric units must be used for all measurements and the SI system (System International de Unites) used insofar as possible.

Numbers. Use Arabic numerals for all numbers with two or more digits and for all measurements such as time, weight, or degrees except when the number is the first word in a sentence. Spell out numbers when they are the first word in a sentence or when they are less than 10 and not measurements, except when in a series in which one figure has two or more digits. The percentage sign should be used in conjunction with a number (5%), but percentage should be written in full when used as a noun (germination percentage). Dates should be given as 2 December, 1938, for example.

Nomenclature. Species should be described by their scientific ('Latin') names. At first mention in the main text the full binomial and authority must be given, but subsequently the genus should be abbreviated to its initial letter and the authority omitted. Authorities are not quoted after Latin names in the title or abstract. Crop varieties should be identified by single quotation marks, for example, 'Ranger' alfalfa (*Medicago sativa* L.)

Tables. Tables should be numbered consecutively with Arabic numbers and should be reduced to the simplest form. Each table should be typed on a separate page from the main text. Table headings should be brief but complete and self-contained. Use the following symbols for footnotes, in this order: †, ‡, §, ¶, #. Asterisks are used only to indicate statistical significance, with * and ** representing significance at the 0.05 and 0.01 probability levels, respectively. Do not duplicate table information in figures.

Figures. All electronic images should be submitted in their native file format without insertion into a .DOC or text file, such as, MS Word or WordPerfect. This is necessary because any graphic files embedded into a text file must be extracted for use with layout software during typesetting. Graphic files extracted from a text file are not as useable as the form they were in before insertion. Examples of acceptable graphic file types would be .TIF, .JPG, .BMP and .EPS. Images should be high resolution without compression. Alternatively, high quality original prints of photographs or halftone reproductions may be provided with good dark and white contrast. Photographs should only be submitted if they are essential for understanding the manuscript. Prepare drawings for graphs and charts with India ink, dry-transfer lettering system or laser printer output on smooth white paper. For computer generated line art, submit original printouts, not poor quality copies. All figures should be of sufficient size and quality to allow for reduction by half or more for printing. Lettering should be kept at a minimum in graphs. All lettering, symbols and lines must be large enough, clear enough and thick enough to still be easily read and prominent after reduction. Preferred symbols for line art figures are black and white open and closed squares, circles and triangles. Do not use colors, shades of gray, or fine screens or patterns to fill bars on graphs or wedges on pie charts. Use solid black or white, well-spaced parallel lines, widely spaced dots, or other black and white line art methods. Again, any patterns and lines should be able to withstand reduction by half or more. Label the back of each figure with the name of author and figure number. Figure captions should be brief, self contained and listed consecutively on a separate sheet at the end of the manuscript.

Acknowledgment. This section lists institutional sponsors with identification of the research project including granting agency recognition, if appropriate. This segment can also be used to thank anyone who was instrumental in or contributed to the completion of this study.

References. Either the author-year or numbered notation may be used in the text. Citations by authors in the text should appear as Smith (1996) or (Smith, 1996). Use "et al." each time when there are three or more authors for

a reference in the text, but give all authors in the reference list itself. In the reference list, arrange all published citations alphabetically by author: for example, last name and then initials of the first author, with each subsequent author listing arranged with initials/name first and then last name. Citations should include names of all authors, year, complete title, abbreviated journal title, volume number and inclusive pages. Cite personal communication and unpublished work only in the text, not in the reference list. Examples of acceptable references are:

- Koning, G., D. M. TeKrony, T. W. Pfeiffer and S. A. Ghabrial. 2001. Infection of soybean with soybean mosaic virus increases susceptibility to *Phomopsis* spp. seed infection. *Crop Sci.* 41:1850–1856.
- Bernard, R. L. and M. G. Weiss. 1973. Qualitative genetics. p. 117–154. *In Soybeans: Improvement, production, and uses.* B. E. Caldwell, R. W. Howell, J. W. Judd and H. W. Johnson, (eds.) 1st ed., Agron. Monogr. 16. ASA, CSSA, and SSSA, Madison, WI.
- Fehr, W. R. and C. E. Caviness. 1977. Stages of soybean development. *Spec. Rep.* 80. Iowa Agric. Home Econ. Exp. Stn., Iowa State Univ., Ames.
- McGee, D. C. 1992. Soybean diseases. *Am. Phytopathol. Soc.*, St. Paul, MN.
- AOSA. 2005. Rules for testing seeds. *Assoc. Offic. Seed Anal.*, Las Cruces, NM.

It is always preferred for papers to have references, but some papers based on presentations or workshops may be acceptable without them by prior arrangement with the Editor.

Proofs, publication charges and reprints. One set of page proofs in Adobe Acrobat format will be returned to the corresponding author by e-mail attachment. Corrections should be restricted to printer's errors and returned to the Editor promptly. *Seed Technology* does not require page charges, however reprints can be ordered from the publisher when returning corrected proofs.

GUIDELINES FOR SUBMISSION

Initial submission may be on paper, on disk, or by e-mail attachment. The manuscript should be typed, double spaced with ample margins (at least 4.0 cm on each side) on one side of line-numbered paper (approximately 21 x 28 cm). If submitted on paper, when the necessary revisions are made and the paper is accepted, authors must submit a final version on computer disk or by e-mail attachment, accompanied by two identical copies on paper. Both high density 3½-inch PC disks or CD-ROM are acceptable. When initially submitting a manuscript, mail four paper copies or two paper copies with a CD to:

Dr. Allen Knapp	Phone: (515) 294-9830
Crops Research	Fax: (515) 294-5506
Agronomy Department	
Iowa State University	
Ames, IA 50011-1010	

Electronic submission. Manuscripts submitted electronically must follow the same style as a paper submission to include the text of the manuscript and all tables and figures in an acceptable format. MS Word or Corel WordPerfect

are the preferred formats for submitting files on 3½-inch high density PC disk or CD-ROM. If files are submitted as e-mail attachments, both Macintosh and Windows versions of MS Word may be used. Files can also be accepted in MS-Works, RTF, ASCII, and other formats if the preferred options are not available. Contact the Editor if you have questions. Manuscripts submitted by e-mail attachment should be sent to:

adknapp@iastate.edu

INSTRUCTIONS FOR *SEED TECH NOTES*, TECHNICAL PAPERS AND SYMPOSIA OR WORKSHOPS

The format for *Seed Tech Notes*, technical papers and presentations from symposia or workshops is as for full length papers insofar as practical. The text headings may be the same as a full paper or may be arranged by **Abstract**, **Experimental Techniques**, **Results and Discussion**, and **References**, if that format is more suitable to the presentation of the material. The Experimental Techniques section will include a brief narrative of those elements normally included in the Introduction and Materials and Methods sections of full length papers. *Seed Tech Notes* and technical papers are usually much shorter and may present only preliminary research data compared to full length papers. These papers should not exceed four pages of printed text and a maximum of two figures or photographs. Papers presented at committee meetings, symposia and workshops not containing cited references or other conventional journal paper elements may be considered for publication if these presentations contain information of a practical nature or general interest in seed biology and technology.

PUBLICATION OF SYMPOSIA

Manuscripts resulting from symposia on seed biology or technology topics will be considered for publication in a single volume of *Seed Technology* by prearrangement with the Editor. Manuscripts may originate from symposia sponsored by the Association of Official Seed Analysts or the Society of Commercial Seed Technologists or from appropriate seed symposia sponsored by other organizations. Symposium organizers desiring to publish a set of manuscripts in *Seed Technology* must solicit the Editor with the following information: (i) title, date and location of the symposium, (ii) the organization affiliated with the symposium, (iii) names, addresses, e-mail and telephone numbers of symposium organizers and (iv) titles and abstracts for each paper to be considered for publication. Symposium papers are subject to the usual format described above for *Seed Technology* and will be reviewed by the Editor prior to acceptance for publication.

If these guidelines are not closely adhered to, papers will be returned to authors for revision or released from further consideration for the journal.

Editorial – Wayne Guerke 3

REFEREED PAPERS

Impact of Mechanical Damage to Hybrid Maize Seed from Harvesting and Conditioning / S. Adesola Ajayi, Gerhard Rühl and Jörg M. Greef 7

Partial Purification and Characterization of Single-Strand-Specific Nucleases from Gram and Pea Seedlings / Zafar Rasheed 22

Alleviation of Salinity Stress by Seed Invigoration Techniques in Wheat (*Triticum aestivum*) / Shahzad Maqsood Ahmad Basra, Irfan Afzal, Shoaib Anwar, Muhammad Anwar-ul-Haq, Muhammad Shafiq and Kashif Majeed..... 36

Salinity Effect on Ion Content and Relationship Between Ion Leakage, Growth, and Salinity in Different Vegetable Seeds / Muhammad Jamil, Eui Shik Rha and Mi Suk Han 47

Modeling the Temperature Effect on Days to Germinate Some *Hypericum* Species from Turkey / Cüneyt Çırak, Mehmet Serhat Odabaş, Ali Kemal Ayan and Kudret Kevseroğlu 58

Pattern of Fruit and Seed Maturation in Himalayan Maple (*Acer caesium*) / S. S. Phartyal and R. C. Thapliyal..... 64

SEED TECH NOTES

Laboratory Test to Detect the Presence of Small Broomrape (*Orobanche minor*) in Red Clover / Sabry Elias, Adriel Garay, Juan Zavala and Stephen Alderman..... 73

Germination Properties of Some Wild Medicinal Plants from Iran / Mohammad Bannayan, Farsad Nadjafi, Mehdi Rastgoo and Leila Tabrizi 80

Breaking Seed Dormancy of *Selinum wallichianum*, a Medicinal Plant of the Himalaya / Meena Joshi, R. S. Rawal and Uppeandra Dhar 87

Instructions to Authors..... 93
